Exam : **700-702**

Title : Cisco Application Centric
Infrastructure for System
Engineers

Vendor : Cisco

Version : DEMO

NO.1 With which option can the Cisco Application Policy Infrastructure Controller be configured?

- A. With the Cisco UCS Manager GUI
- B. With a service level agreement
- C. With the Cisco UCS Central interface
- D. With the application programming interface
- E. With the CLI

Answer: E

NO.2 What is the function of the OpFlex protocol policy repository?

- A. Limits device features
- B. Stores statistical information
- C. Captures and stores the user intent in policy
- D. Learning and knowing every device in the network
- E. Resolves policy and configures hardware/software

Answer: C

Explanation:

The policy repository (PR) is a logically centralized entity containing the definition of all policies governing the behavior of the system. In Cisco ACI, this function is performed by the Cisco APIC or by the leaf nodes of the network fabric. The policy authority handles policy resolution requests from each policy element.

NO.3 In the Cisco ACI fabric, which address is IP ARP packet forwarding based on?

- A. Multicast group VTEP
- B. Destination address contained within the ARP packet
- C. Spine proxy VTEP
- D. Leaf vPC VTEP
- E. Leaf VTEP
- F. Border leaf VTEP

Answer: B

NO.4 In the Cisco ACI fabric, which device enforces the policy?

- A. VM NIC
- B. Hypervisor switch
- C. Spine proxy
- D. Cisco APIC
- E. Ingress leaf
- F. Egress leaf

Answer: F

NO.5 Which attribute that is associated to the end point identity does the Cisco ACI fabric use VxLAN

to remove?

- A. Latency
- B. Operating system
- C. Scale
- D. Location
- E. Payload
- F. Address

Answer: D

NO.6 Which statement describes a bridge domain as it relates to the Cisco ACI?

- A. Separates tenants
- B. A separate routing instance
- C. A container for IP subnets
- D. A container for end points

Answer: C
