No help, Full refund!

**Exam** : **C\_BW4H\_211**

**Title** : SAP Certified Application Associate - Reporting, Modeling and Data Acquisition with SAP BW/4HANA

**Vendor** : SAP

**Version** : DEMO

**NO.1** For which requirements do you suggest an SAP HANA modeling focus rather than an SAP BW/4HANA modeling focus?? Note: There are 2 correct answers to this question.

- A. Load snapshots or deltas from different sources on a periodic basis
- B. Report on a harmonized set of master data
- C. Leverage SQL in-house knowledge
- D. Enhance existing SAP HANA content models

**Answer:** C,D

**NO.2** Which development object needs to be built to generate an HDI Container?

- A. HDB module
- B. SQL script procedure
- C. Package
- D. Space

**Answer:** A

**NO.3** Where can you automatically generate a process chain?

- A. from a streaming enable DataSource
- B. Form a data flow object
- C. Within the process chain editor app
- D. Within the process chain maintenance

**Answer:** B

**NO.4** You would like to highlight the deviation from predefined threshold values for key figures actual revenue. Which BW feature do you use?

- A. Conditions
- B. Calculated key figures
- C. Structure
- D. Exceptions

**Answer:** D

**NO.5** You notice that an SAP ERP ODP\_SAP DataSource is delivering incorrect values into the first persistent data layer in SAP BW/4HANA. Which options do you have to analyze a potential extractor issue? Note: There are 2 correct answers to this question.

- A. Use transaction RSA3 (Extractor checker) in SAP ERP
- B. Use program RODPS\_REPL\_TEST in SAP ERP
- C. Use the ODOQ maintenance in SAP BW/4HANA
- D. Check entries in table RSDDSTATEXTRACT in SAP ERP

**Answer:** A,B

**NO.6** Which recommendations should you follow to optimize BW query performance? Note: There are 3 correct answers to this question

- A. Use characteristic filters that overlap
- B. Use include functions in the restricted key figures.

- C. Use mandatory characteristic value variables
- D. Use exclude functions in the restricted key figures
- E. Use fewer drill-down characteristics in the initial view

**Answer:** B,C,E

- \* A. Use fewer drill-down characteristics in the initial view: This can improve the query performance by reducing the amount of data that needs to be transferred and displayed at the start of the query execution. The user can drill down to more details later if needed<sup>1</sup>.
- \* D. Use mandatory characteristic value variables: This can improve the query performance by restricting the data selection to a smaller set of values that are relevant for the user. The user can also change the variable values later if needed<sup>1</sup>.
- \* E. Use include functions in the restricted key figures: This can improve the query performance by avoiding unnecessary calculations and aggregations that are done when using exclude functions. Include functions are also more efficient than selections or restricted key figures when filtering data<sup>1</sup>

**NO.7** What are the key benefits of using the SAP Landscape Transformation Replication Server for data provisioning into SAP HANA? Note: There are 2 correct answers to this question.

- A. Virtualization capabilities
- B. Real-time and scheduled data replication
- C. Support of cluster and pool tables
- D. Log-based replication

**Answer:** B,C

**NO.8** "For InfoObject ADDRESS, the High Cardinality flag has been set. However, ADDRESS has an attribute CITY without the high Cardinality flag." What is the effect on SID values in this scenario?

- A. SID values are not stored for InfoObject ADDRESS
- B. SID values are generated when InfoObject CITY is activated
- C. SID values are generated when InfoObject ADDRESS is activated.
- D. SID values are generated when data for infoObject ADDRESS is loadet

**Answer:** A
